

COMPANY OVERVIEW

Passionate about providing employers easy access to their payroll data, Paycom launched in 1998 as one of the nation's first web-based HR and payroll technology companies. From the beginning, Paycom has been committed to the ongoing development of a single database that lowers labor costs, drives employee engagement and reduces exposure. Paycom's single-database solution eliminates the need to integrate, update or access multiple databases, distinguishing Paycom from other products and services in the marketplace. With 20,000-plus clients across the United States, Paycom has achieved a compound annual growth rate of 42% for 2013 through 2017. On April 15, 2014, Paycom became a public company with its shares opening for trade on the New York Stock Exchange under the ticker symbol PAYC.
